SPA TALASSO

The Tombolo Talasso Resort is above all specialized in thalassotherapy, a very old method that uses all the resources of the marine environment, i.e water, salts, algae, mud and climate.

Five pools covered inside the cave make the Tombolo Talasso Resort a bed of well-being that this now widespread practice offers in one of the most evocative areas of the Tuscan area.

The saline water is taken at 900 meters from the coast and placed in the numerous tanks, each one with a specific function: the heated pool, with its 35-37 ° C, allows the skin to better absorb the marine mineral salts and it is ideal for a soft activity motor; the swimming pool with hydro massage and showers; the Kneipp vascular pool, which alternates cold and warm water in order to promote circulation; the emotional pool with high salinity for water massages. Exclusive thalasso treatments help to regain a renewed psycho-physical balance.

The path of the pools has a duration of 120 minutes, to complete this route for another 60 minutes, guests have at their disposal the Finnish Sauna, the Turkish Bath, the Relax Area, aroma-steam-bath and salt wall. Thalassotherapy is the hallmark that has allowed us to become one of the most equipped and appreciated in Italy, award-winning for many consecutive years.
